SKILLS

Languages:	C++, C, Java, HTML
Tools/Platforms:	AWS Cloud Services, Docker, Linux (Ubuntu / Terminal – Commands & Server Basics)
Technical Skills:	UI/UX Design, Devops, AI
Soft Skills:	Problem-Solving, Team Player, Adaptability

PROJECTS

AI Smart Home Troubleshooter GitHub	Sep' 2025
- Built an AI-powered web assistant to diagnose and resolve smart home device issues in real time. - Designed an interactive chatbot interface for identifying device-specific problems like Wi-Fi failure, overheating, or irresponsibility. - Implemented rule-based logic to deliver accurate, instant troubleshooting solutions. Enhanced user experience with a clean, responsive UI and smooth chat workflow. Achieved up to 30% faster troubleshooting through automated issue detection.	
Tech: Tableau, SAP, DNS, SSL Certificates.	
Cloud Monitoring And Alerts GitHub	Apr' 2024
- Developed a real-time cloud monitoring and alerting system using AWS and Azure to track key performance metrics and system health. - Configured automated alerts and dashboards, to detect system failures and performance issues early. Improved incident response time by enabling proactive monitoring and faster troubleshooting. - Built a real-time cloud monitoring and alerting system using AWS and Azure with automated dashboards, alerts, and log analytics to proactively detect failures and reduce incident response time.	
Tech: AWS (EC2, S3, CloudWatch, SNS, IAM).	

TRAINING

Data Structures Algorithms Using C++ - Cipher School Certificate	Aug' 2025
- Implemented and optimized core data structures including Arrays, Linked Lists, Stacks, Queues, Trees, Graphs, and Hash Tables using C++. - Developed proficiency in algorithmic thinking and optimization techniques for competitive programming and real-world applications. - Solved 50+ algorithmic problems covering sorting, searching, recursion, and dynamic programming, improving problem-solving efficiency. Applied advanced algorithmic techniques and STL to enhance code performance and reusability, achieving faster execution and cleaner solutions.	
Tech: C++, Object-Oriented Programming, Templates, Memory Management.	

CERTIFICATES

Introduction To Image Processing Coursera	Aug' 2025
Video Compression Demystified Infosys (Springboard)	Aug' 2025
Privacy And Security In Social Media SWAYAM	Nov' 2025
Git and Github Cipher School	Aug' 2025

CO-CURRICULAR ACTIVITIES

Participated in an NGO-led plantation and adoption initiative to promote environmental sustainability.	Jul' 2024
- Developed teamwork, social responsibility, and environmental awareness through field activities. - Raised awareness among local residents about the importance of tree conservation and environmental sustainability.	

EDUCATION

Lovely Professional University Bachelor of Technology Information Technology; CGPA: 6.2	Phagwara, Punjab Aug 2023 – Aug 2025
M.G Inter college Intermediate PCM; Percentage: 62.3%	Gorakhpur, Uttar Pradesh Mar' 2022 – April' 2023
M.G Inter college Matriculation Percentage: 78%	Gorakhpur, Uttar Pradesh Mar' 2020 – April' 2021
